Company: Gateway Research (www.gatewayresearch.com)

We are looking for someone who could help us with the development of our analysis tools and processes. A Computer Science graduate that also has knowledge of Data Visualisation would be a great fit. Gateway provides commercial research services around how people shop, respond to advertising, etc. using technology like eye tracking and biometrics. The role would help us develop innovate solutions, optimise and extend our analysis capabilities for example, developing a database solution for storing and ongoing benchmarks, new ways to code, analyse and visualise the data - there would be no shortage of projects. This would be a great opportunity for the right person to get involved with a growing business.

Dr Peter Brawn
Managing Director
